PROJECTS

DCGAN — This project is live. All Links are in my portfolio.

This project involves generating facial images with a training set of 7K low resolution images. The end result is not that satisfactory but it was fun dealing with DCGAN.

Object Detection with YOLO

I use YOLO to detect the objects from a given video.

Twitter Sentiment Classification

Basic Project using the twitter API in which I try to classify sentiments of tweets on any given topic.

SKILLS

Machine Learning

Tensorflow

Python

Kaggle
